

Eureka!

The **Eureka!** is the newest and smallest speaker from morel acoustics usa, inc. The elegant cabinet is available in either a gloss black or a gloss white finish. The radius design (rounded) on the edges eliminates diffraction in the mid and high frequencies. The 1.1" (28mm) silk dome tweeter has a detailed and delicate sound. The 4" woofer produces sweet and smooth room-filling sound. When you hear the Eureka!, you will think that it is coming from a much larger speaker.

Cabinet system	2-way speaker system, sealed
Tweeter unit	1.1" (28mm) soft dome
